

# OCCUPANCY REPORTING

**SVPRO**

Powered by **SECUREVIZUAL**

**SVPRO** Occupancy Reporting provides real-time activity reporting for your campus, shopping center, corporate complex, or highrise office building. Best of all, there is no need for any additional infrastructure such as turnstiles, card readers, temperature scanners, people counters, or cameras.

Simply connect **SVPRO** to your existing access control database and allow our powerful algorithms to do their job and ensure you are meeting CDC guidelines or established building occupancy levels.

Our easy-to-use interface provides comprehensive desktop dashboards for monitoring occupancy levels by continuously searching your database for new site activity. No worries, even if you are not at your desk. Our scheduled report delivery and threshold-triggered email alerts provide regular updates based on predefined threshold settings 24x7 regardless of your location.

## FEATURES AND HIGHLIGHTS

- Easy Report Customization Based Assigned Filters
- No, Special Skills or IT Expertise Required
- Algorithms Continuously Monitor Site Activity Even When You Can't
- No Additional Infrastructure Cost
- Key Personnel Alerted in Real-time Regarding Occupancy Levels
- Proactively Respond to Possible Overcrowding Exposure
